Reference - Luiz Cruz

May 16, 2022

To Whom it May Concern,

I highly recommend Luiz Cruz as a prime candidate for employment in the Project Controls arena. Luiz has worked for TIT under my direction as a Project Controls Consultant in our Galveston office.

His performance was excellent. He was responsible for developing VB automated Cost Progress Status Reports for several maintenance and expansion projects. In addition, he also contributed with the development of several resource loaded master schedules for some of our key projects in Primavera P6. He participated in meetings with contractors and had a good relationship with the project team.

Mr. Luiz is a self-starter, has excellent analytical skills and is very organized. If you have any questions about his experience, competence, overall job posture, please feel free to contact me.

Sincerely yours,

Matt Toland
